

NETWORK TECHNOLOGIES INTERNATIONAL, INC.

TURNING DATA INTO INTELLIGENCE

API SERVICES

Our suite of APIs are built for speed, scale, and accuracy across industries, and deliver real-time access to authoritative telecom data, enabling seamless enrichment within your workflows. With decades of telecom expertise, NTI helps organizations unlock the full value of their customer and operational data. By integrating our APIs with your systems, you can enhance user experiences, drive smarter decisions, and gain a competitive edge with actionable telecom intelligence.

VALIDATION

DATA INTEGRITY
TELECOM NUMBERING VERIFICATION

Ensure the integrity of every telephone number and other technical numbering in your system with high-performance, real-time validation service that goes beyond basic formatting checks.

The validation service confirms number type, eligibility, known activity status, and resolves partial or inconsistent numbers into fully dialable and accurate numbering. Our solution delivers actionable data for all industries.

The Validation API helps reduce failed contact attempts, improve customer insights, and drive better business and mission outcomes across call centers, CRM systems, and compliance platforms.

NORMALIZATION

TELEPHONE NUMBER STANDARDIZATION
CONFIDENCE SCORING

Standardize telephone numbers at scale with the normalization service designed to format to international standards, align metadata fields, and resolve inconsistencies across inputs and systems.

Unlike generic algorithms, our solution uses accurate, verified telecom data to ensure precise results, enabling seamless customer interactions and reliable downstream analytics.

The Normalization API helps unify telecom data, reduce errors, and streamline operational workflows, supporting global commercial applications and government initiatives alike.

NETWORK

GEOSPATIAL ANALYSIS
CRITICAL NETWORK INFRASTRUCTURE

Access our comprehensive global telecom network infrastructure datasets, purpose-built for organizations that require precise, structured, and authoritative intelligence across every layer of telecom networks. Delivering unified access to our global network intelligence, spanning from terrestrial switching and transmission networks including data centers, coverage maps, and telecom service boundaries to undersea submarine cable systems.

The Network API empowers users to understand the global network infrastructure, critical for network planning, geopolitical analysis, resiliency studies, and national security goals.

DATA ACCURACY + TRUST

- Standardizes telecom data at scale
- Reliable validation and verification services
- Reduces false positives with precision logic

REAL-TIME PERFORMANCE

- Low-latency for time-sensitive applications
- Built for high-throughput, concurrent API calls
- Supports synchronous and batch modes

INTEGRATION + FLEXIBILITY

- Works with any database or data platform
- RESTful API design with multiple outputs
- MCP compatible interface

SECURITY + CONTROL

- Encrypted API endpoints with HTTPS
- Key-based access control and authentication
- Rate-limiting, logging, and usage monitoring

AN ISO 9001 CERTIFIED COMPANY

TURNING DATA INTO INTELLIGENCE

LICENSING + PRICING

NTI products are licensed based on user count, with pricing that scales according to usage volume, data scope, and integration complexity.

Annual and multi-year agreements are available, along with flexible terms for short-term trials, pilot programs, or evaluation access. Whether you're exploring a proof of concept or ready to deploy at scale, we will work with you to find a plan that fits.

Volume discounts are available for larger teams or bundled product suites.

For a custom quote or to discuss licensing options in detail, reach out to our team directly.

CUSTOMIZATION + SUPPORT

Each license provides comprehensive support, with robust configuration options to tailor functionality to your team's workflows and systems.

- Dedicated **technical support** to assist with API deployment, maintenance, and integration, ensuring smooth and uninterrupted operations across your environment.
- Stay aligned with **evolving needs through continuous updates**, ranging from performance improvements and bug fixes to expanded data coverage and enhanced features.
- Easily integrate NTI's APIs **with your internal platforms, third-party tools, or AI-driven systems** for seamless data enrichment, validation, and analysis.
- Receive expert guidance from NTI's team of **subject matter specialists**, ready to support complex data logic, usage questions, and custom implementation strategies.
- Participate in **live onboarding and technical walkthroughs** designed to ensure proper configuration from day one.
- Access comprehensive API documentation, including sample calls, code snippets, error-handling guides, and best practices to support both developers and analysts.
