

NETWORK TECHNOLOGIES INTERNATIONAL, INC.

TURNING DATA INTO INTELLIGENCE

ORION - DATA MODELING PLATFORM

KEY FEATURES

Better Intelligence Viewing
Multiple Data Sets

Analyst-Centric User Interface
to Visualize + Edit with Ease

Multi-User Session Collaboration
with Merge Conflict Handling

Accelerates Productivity with
Bulk Data Ingest

Powerful Search + Data
Filtering Capabilities

Benefit From Our Global
Telecommunications Data

Work With Experts in
Telecom Network Data

WHAT IS ORION?

ORION is our **data modeling platform** that consolidates sourcing, validation, and modeling workflows into a single collaborative environment, designed for teams working with complex, evolving datasets such as telecommunications networks. ORION provides **critical data management and governance** needed for the highest level of quality control and data integrity.

ORION enables teams to **collaboratively** transform fragmented data into **validated, structured intelligence**. ORION allows users to **create, edit and visualize** in the front-end user interface while simultaneously building data records and relationships in the back-end data model.

WHY ORION?

Reliable + Collaborative. Built for high availability, analyst-centric editing, and seamless multi-user collaboration with conflict resolution and shared sessions.

Streamlined Sharing. Supports clear, permission-based access, from robust write capabilities to intuitive read-only sharing for publishing intelligence.

Data-Driven Efficiency. Enables powerful search, filtering, and bulk data ingest for rapid, high-quality data operations and productivity.

Trusted Intelligence. Attribute-level sourcing, responsive customer support, and precision tooling that scales from solo analysts to enterprise teams.

QUALITY + VERSIONING

- Quality control in every step
- Trunk - branch - merge configuration
- ISO 9001:2015 certified processes

PERFORMANCE + SCALABILITY

- On premise or web-based platform
- Optimized for high performance
- Powered by industry-standard technology

INTEGRATION + FLEXIBILITY

- Graph and relational model
- Integration with RESTful APIs
- Customizable filters, rules, and schemas

SECURITY + CONTROL

- Controlled instance for each user group
- Access controls and data filtering on PKI certificates
- Read-only and write access user types

TURNING DATA INTO INTELLIGENCE

LICENSING + PRICING

NTI products are licensed based on user count, with pricing that scales according to usage volume, data scope, and integration complexity.

Annual and multi-year agreements are available, along with flexible terms for short-term trials, pilot programs, or evaluation access. Whether you're exploring a proof of concept or ready to deploy at scale, we will work with you to find a plan that fits.

Volume discounts are available for larger teams or bundled product suites.

For a custom quote or to discuss licensing options in detail, reach out to our team directly.

CUSTOMIZATION + SUPPORT

Each license provides comprehensive support with flexible customization options to tailor **ORION** to your unique needs.

- Dedicated **technical support** for the ORION software and database platform to ensure uninterrupted operations.
- Stay current **with continuous updates**, including feature improvements and bug fixes, for an optimized user experience.
- Integrate **ORION with other software**, AI solutions, or deploy and interface with NTI's APIs enabling efficient data integration and usage.
- Get access to **advice from subject matter experts** and assistance for both data and software inquiries.
- Engage in **virtual interactive training sessions**, developed to improve user skills and help analysts make the most of ORION's features.
- Benefit from **detailed user guides, FAQs, and technical documentation**, which provide step-by-step instructions and reference materials for efficient onboarding of new users.
